JOB DESCRIPTION
Title: Test Engineer Fiber Optics (Junior)

Reports To:

Technical Director

Targeted Start Date:

TBD

Work Hours:

Regular full time.

Roles and Responsibilities

Provides direction for and conducts design verification and qualification tests and ensures compliance to contractual test requirements through development, validation, and execution of environmental and mechanical testing of fiber optic components.

- Generate test plans, procedures, and work instructions from customer requirements
- Setup, configure, and operate test setups, fixtures, and instrumentation as required by test plans, test standards, and customer instructions.
- Implement and deploy test fixtures, testing apparatus and machines and verify their appropriateness
- Ensure the accuracy and consistency of data results through thorough documentation processes
- Operate a variety of computer automated and manual test equipment including fiber optic data acquisition systems, environmental chambers, vibration systems, and assorted measurement transducers
- Contracting, scheduling, and supervising tests with sub-contracting facilities
- Sourcing, obtaining quotations, and selecting required lab supplies and materials to build test fixtures to conduct tests
- Design test fixtures as required per customer requirements, test plan, and test standards
- Validate test methods

Requirements (Special Knowledge, Education, Ability and Skills)

- Bachelors Degree in an engineering discipline (mechanical, electrical, or physics desired)
- 0 to 2 year of work experience in a relevant field
- Familiarity with data acquisition systems, data analysis and processing.
- Knowledge of standard business software products (Microsoft Office, Outlook, CRM, etc.)
- Ability to maintain excellence and accuracy in a dynamic, fast-paced, multi-disciplinary environment.
- Ongoing commitment to advance knowledge in the field of fiber optics, testing, and standards compliance.
- Must work well in a team environment
- Execution of tests in strict accordance with the quality system
